

Estrada Flores, Diego.

Front-end web developer specializing in UX & UI, with an interest in functionality, performance and open-source. Proactive, responsible and detail-oriented.

EXPERIENCE

Systems Engineer – Instituto iMaster

July → August, 2026

Development of responsive websites and landing pages. Responsible for optimizing performance, maintaining existing projects, and proposing improvements to current workflows.

Project Manager – Profesionalización Virtual

September, 2025 → July, 2026

Design of credentials, photography direction and editing, web project development, and coordination of digital products, ensuring consistency, quality, and timely delivery.

Jr. Web Designer – Pixel Invitación

August → September, 2025

Design of personalized digital invitations using graphic resources and CMS. Team collaboration, meeting deadlines, and alignment with the company's design approach.

Main Front End Developer – Profesionalización Virtual

April, 2024 → August, 2025

Design and development of interfaces for systems, websites and applications. Responsible for UX & UI design, layout, testing, and creation of reusable components and utilities.

Team Leader & Full Stack Developer – Municipal DIF

October, 2023 → May, 2024

Development of the Integral Management System web project. Overseeing the team's code, defining the project architecture, developing the database, and creating the user interface.

FORMATION

Technical Professional–Bachelor in Computer Science

Colegio Nacional de Educación Profesional Técnica – 2021 → 2024

Academic excellence. Training in AI, technology, networking and programming. Participation in robotics club, and certifications in networking and Excel applied to databases.
